

Jonas Haglund

Education

- 2007-08 - 2010-08 KTH/STH, Hälsovägen 11C, 141 57 Huddinge, Sweden.
Start of bachelor in computer engineering with focus on computer networks.
- 2010-08 - 2012-06 KTH/CSC, Lindstedtsvägen 5, 114 28 Stockholm, Sweden.
Continuation of bachelor in computer engineering with focus on computer science.
- 2012-08 - 2016-10 KTH/CSC, Lindstedtsvägen 5, 114 28 Stockholm, Sweden.
Master in computer engineering with focus on general problem solving, formal methods, systems software and hardware.
- 2016-10 - 2023-06 KTH/EECS, Lindstedtsvägen 5, 114 28 Stockholm, Sweden.
PhD in computer science with focus on formal verification of memory isolation of DMA.

Teaching Experience

- 2016-10 - 2020-12 KTH/EECS, Lindstedtsvägen 5, 114 28 Stockholm, Sweden.
I have been a teaching assistance during my PhD in the following courses (corresponding to one year of full time work): Computer Security; Logic in Computer Science; Formal Methods; and Algorithms, Data Structures and Complexity. I mainly: did tutorials; helped students with labs; and graded labs, assignments and exams. I have also developed lab assignments for the formal methods course involving C program verification and model checking.

Other Experience

- 2016-10 - 2023-06 KTH/EECS, Lindstedtsvägen 5, 114 28 Stockholm, Sweden.
I was a member of the PhD computer science program council. I helped with organizing retreats for the PhD students, participating in a PhD computer science program evaluation, documenting a description of the PhD computer science program, attending council meetings, and announcing PhD courses and PhD student requests for PhD courses. I have also reviewed three papers in the security and formal methods field.

Other Industry and Research Experience

- 2016-03 - 2016-09 RISE Research Institutes of Sweden, Isafjordsgatan 22, 164 40 Kista, Sweden.
Worked on a research project (PROSPER) where I programmed parts of a hypervisor and extended a port of Linux to run on top of the hypervisor.
- 2021-01 - 2021-03 Arm Ltd, 110 Fulbourn Road, Cambridge, CB1 9NJ, United Kingdom.
A seven week internship where I worked on modeling and formalizing security properties of an ARM architecture. This was during the COVID pandemic and I worked from home in Sweden.

Publications

Haglund, J., & Guanciale, R. (2022). Formally Verified Isolation of DMA. In A. Griggio & N. Rungta (Eds.), Proceedings of the 22nd Conference on Formal Methods in Computer-Aided Design – FMCAD 2022 (pp. 118–128). TU Wien Academic Press. DOI: https://doi.org/10.34727/2022/isbn.978-3-85448-053-2_18.
A general model of DMA controllers which is formalized and verified with respect to memory isolation.

Haglund, J., Guanciale, R. Trustworthy isolation of DMA devices. J BANK FINANC TECHNOL 4, 75–94 (2020). DOI: <https://doi.org/10.1007/s42786-020-00018-x>.

A journal article that is an extension of the following article. Describes a monitor that checks that a NIC is isolated, with the monitor being a part of a hypervisor with Linux on top.

Haglund, J., Guanciale, R. (2019). Trustworthy Isolation of DMA Enabled Devices. In: Garg, D., Kumar, N., Shyamasundar, R. (eds) Information Systems Security. ICISS 2019. DOI: https://doi.org/10.1007/978-3-030-36945-3_3.

A case study of formally verifying the conditions under which a network interface controller (NIC) can access only certain memory regions.

Professional Presentations

- 2022-10 Paper at FMCAD 2022.
- 2022-06 Research Group Retreat. Described a formal model of a USB DMA controller.
- 2022-06 Seminar at KTH/EECS. Described a formal analysis tool of DMA controllers, including a USB DMA controller.
- 2021-11 Seminar at KTH/EECS. Presentation of 80% of my PhD studies.
- 2021-02 Seminar at ARM. Described a formal analysis of memory isolation of a NIC DMA controller, with a runtime monitor configuring the NIC to respect isolation.
- 2020-06 Seminar at KTH/EECS. Presentation of 50% of my PhD studies.
- 2019-12 Paper at Internal Conference in Information Systems Security (ICISS) 2019.
- 2019-11 Seminar at KTH/EECS. Presentation of 30% of my PhD studies.
- 2019-06 Poster presentation at Euro S&P. Described formal verification of memory isolation of a NIC DMA controller.
- 2019-05 Research Group Retreat. Described a formal model and a memory isolation proof of a NIC DMA controller.

Expertise

- Formal Methods Modeling hardware, formalization of properties, and formal proofs (interactive theorem proving; I have some experience with model checking, NuSMV, and deductive verification, Frama-C).
- Hardware/Software Interface Low-level programming in C and assembly, and configuration of peripherals.
- Systems Software Hypervisors and operating systems (mainly memory management and peripherals).

Interests and Future Learning

Techniques/tools that I am familiar with are within parentheses.

- Hardware CPUs/Computer architecture (ARM), I/O and peripherals, and network-on-chips.
- Systems Software OS and device drivers (Linux), hypervisors, and compilers.

Logic and Formal
Verification

Modeling and proving in interactive theorem proving (HOL4), including using it for development (synthesis).

Personal Characteristics

I like to have a deep understanding of concepts and details, and to achieve results with high quality. I also try to have a long-term perspective.
